

Body Systems Project

Directions: You and your partners are being assigned a body system to research. Your research will be presented to the class. You will create a poster or PowerPoint that highlights the key areas to your body system. Included in your presentation should be:

- Name of body system
- Function of the body system (need to be 3-5 sentences minimum)
- The organs/structures associated with the body system (need teacher approval)
- Disorders associated with your system (Two disorders)
- Interactions (explain how your system interacts with two other body systems – be specific!)
- A picture or creative representation of your body system

You will be graded on completeness and neatness of your system.

- 1) Nervous
- 2) Circulatory
- 3) Respiratory
- 4) Digestive
- 5) Immune
- 6) Skeletal
- 7) Muscular
- 8) Skin
- 9) Endocrine

A rough draft must be presented to Mr. Noble before you begin the project.
