Cell Transport

Use each of the following words to complete the concept map below:

- Active Transport
- Osmosis
- Diffusion
- Facilitated Diffusion
- Membrane
- Molecules
- Moves across
- Large molecules
- No energy
- Small molecules, no energy
- Pancreas
- Water
- Large molecules
- No energy
- Small molecules, no energy
- Pancreas
- Water

**Plasma Membrane Questions**

- What is the function of the phospholipids that make up part of the plasma membrane?
- What do the bilayer phospholipids consist of?
- What do each of these phospholipid molecules consist of?
- What are the two parts of the phospholipid molecule, and how does each of these parts react to water?
- What are the two parts of the phospholipid molecule, and how does each of these parts react to water?
- What do the phospholipids and cholesterol do?
