Lesson Wrap Up: Recognizing Risk Situations; Methods to Reduce Risk

Part 1: Check for Understanding
Directions: Check your understanding of today's lesson by answering the following True-False questions.

T  F  HIV is transmitted by kissing or holding hands.
T  F  There is a risk of HIV transmission when giving first aid for bleeding.
T  F  Latex has holes in it that are so large that HIV goes right through.
T  F  Assertive communication includes making eye contact, using a firm voice, and stating your expectations.

Part 2: Family-Home Assignment
Directions: Share/discuss the following with your parent(s) or a trusted adult.

2. Do they know which body fluids and which body openings can spread HIV/AIDS?

Part 3: Reflections
Directions: In a summary format, address the following questions. (Be sure to use a minimum of 5 complete sentences.)

3. What did you learn from your parent(s) or trusted adult?

4. Share your own thoughts about what you learned from the family home assignment (Part 2).
